Art Unit: 2856

1. Newly submitted claims 10 and 11 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The originally claimed invention was directed to a semiconductor dynamic sensor comprising a displacement portion having beam structure and displaceable in response to applied dynamic force, whereas newly submitted claims 10 and 11 are directed to a method of transferring a semiconductor dynamic sensor. The inventions are distinct since the method of transferring a semiconductor dynamic sensor can be used with another materially different apparatus, for example, a semiconductor dynamic sensor having a diaphragm instead of a beam structure.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10 and 11 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims 7-9 have not been withdrawn from consideration insofar as they are directed to a method of transporting a semiconductor sensor comprising a displacement portion having beam structure and being displaceable in response to applied dynamic force.

2. Claims 7-9 are allowed.

3. This application is in condition for allowance except for the presence of claims 10 and 11 to an invention non-elected by original presentation for prosecution on the merits. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action

Art Unit: 2856

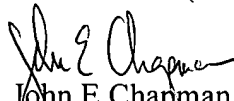

during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maruyama et al. discloses a substrate transportation apparatus comprising a plate-like hand 28 having suction holes 31.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John E. Chapman whose telephone number is (571) 272-2191.
